 ART UNIT 1764

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claimed invention addresses the problem of preventing the formation of undesirable polymeric HCN which fouls the heads column (HCN separation column) in the acrylonitrile and methacrylonitrile recovery process. This problem is solved by inhibiting the formation of an aqueous phase above the feed tray of the heads column, since the presence of the aqueous phase causes the formation of polymeric HCN, in a manner as defined in the method of claim 14. The prior art does not teach or suggest the method claimed in claim 14. In the prior art, e.g., to Bitners et al or Wu, the lower aqueous phase is separated from an organic phase in a decanter, but is silent about the method of claim 14. Since claims 15-22 refer to independent claim 14, they are neither disclosed by the prior art nor are obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450.
